

Analysis Platforms for CMIP6 and CORDEX

31-10-2020 au 31-10-2020

The ENES e-infrastructure project IS-ENES3 H2020-INFRAIA addresses the Coupled Model Intercomparison Project (CMIP) challenges by developing, documenting, and deploying new and advanced models and tools, standards, and services to deal with unprecedented data volumes and model complexity. Data near processing capabilities at the IS-ENES3 High Performance Computing centers are now made accessible to a broader user community *via* the new Trans-national Access (TA) service.

The ENES e-infrastructure project IS-ENES3 H2020-INFRAIA addresses the Coupled Model Intercomparison Project (CMIP) challenges by developing, documenting, and deploying new and advanced models and tools, standards, and services to deal with unprecedented data volumes and model complexity. Data near processing capabilities at the IS-ENES3 High Performance Computing centers are now made accessible to a broader user community *via* the new Trans-national Access (TA) service.

Apply for direct access to compute facilities:

1. Discover the model data you are interested on
2. Run your scripts in the supercomputer
3. Download the results

SUPPORTING THE NEW CMIP6 Third Call Deadline: 31 October 2020 (pre-access test activities are also possible)
